Your mission during this internship

Info

Background:

- Our current learning content is provided by 01Edu.
- We are experimenting with custom content.
- We want to know how the automatic test works in practice

Goal:

- Develop a Python test suite for the following exercise:
  https://github.com/lvisgrit/piscine-test/tree/main/subjects/fourEven

Description:

- Design test cases
- Implement test
- Containerized test to a Docker image

grit:lab

Expected outcome

Expected deliverables:

- Docker file
- Entry point file
- Test file(s)
- Docker image
